

F-200 Dupli-Carver

A Dupli-Carver® lacks only one element to carve beautiful original carvings . . . a brain. No tool will ever be able to replace the abilities of a "master carver", but when used properly, this tool can be as much help to him as his knives and gouges. Carving machines were first developed in the late 1800s to free the skilled carvers from the repetition of duplicating original works in furniture, moldings, and door panels. These machines allowed the less skilled to make precise duplicates with speed. Today's Dupli-Carver® looks as much like the machine of the late 1800s as last year's Indy cars looked to the first Model T. The accuracy, speed, ease of use, and quality of our machines have increased while becoming inexpensive enough for the average craftsman to afford. An intricate chess set needs only 6 originals to carve a 32 piece set. Drawer fronts can be duplicated exactly from one piece to another. Unlimited numbers of copies can be made of hand-crafted originals. The skill and abilities of the "master" will be the only limiting factor on how a Dupli-Carver® can be used.

Table Material	1-1/8" Particle Board
Table Size	32" x 24" x 1-1/8"
Work Area	3' x 5'
Pivot Arms	1/8" Formed Steel
Pivot Bearings	Steel Ball Bearings
Router Guide Shaft	5/8" Hardened Steel
Shaft Bearings	Steel Linear Ball Bearings
Router	1-3/4 HP Porter Cable
Table Legs	16 Gauge Steel Frame
Steel Finish	Baked Enamel
Carving Capacity	14" Dia. x 40" Tall
Spindle Capacity	8" Dia. x 60" Long
Weight	238 lbs
Skid Size	42" x 42" x 16"

The F-200a Spindle Carving attachment allows you to carve gun stocks and table legs up to 8" diameter x 60" long. The frame mounts directly to the tabletop and holds the objects in a horizontal position between two centers. The turntables are linked together to key the objects through 360° rotation. A long rifle stock like the .63 Springfield Military Stock can be carved in less than four hours while a half stock takes less than two hours. Bedposts and tall slender statuary can also be carved.

With the F-200a Spindle Carving attachment this machine is the favorite of gunsmiths with the capability of carving long rifles up to 60" long x 8" in diameter. Take a close look at our specifications and construction. We think you'll agree that it's a solid machine and a solid investment. The F-200PC is supplied with nine router bits (#100 through #109), nine styli (#301 through #309), two mounting turntables, 1 3/4 H.P. Porter Cable Router with speed control, operating and assembly instructions, and even a starter statue and block of wood. Assembly is required.
