

# NorthStar

The NORTHSTAR Carver is recommended for the individual who has his or her own small business and wants to carve large, heavy items, especially anything over 10" width. The NORTHSTAR is a high production machine and very dependable. Popular applications are gunstocks, doors, mantelpieces, plaques, furniture and chainsaw carvings.

The NORTHSTAR Carvers are larger than the K-STAR Carvers and have their own frames. They are capable of doing both relief (flat backed) and 360° (full round) carving. The NORTHSTAR Carver can carve from one to eight duplicates of one pattern at a time by a single operator. They have a cutting range of up to 36" in length, with options up to 72". Width capacities available are 10" or 20" centers.

All the NORTHSTAR models feature cutting spindles that turn at 11,000 RPM. Spindles feature top quality sealed ball bearings and direct belt drives with no idlers. Removable tables for flat work and a reverse mechanism for making simultaneous left and right handed copies of a pattern are optional accessories.
