

## **PORTABLE TEST HAMMER**

Non-Destructive Concrete Hardness Testing

A concrete rebound hammer is the instrument used for non-destructive testing of concrete. This tool allows the user to get immediate results of the strength of the concrete in various parts of a floor or structure. The minimum verifiable strength the test hammer can measure is 1400 psi (10 MPa).

**KIT CONTAINS:** Hammer, roughing stone, recalibration parts and plastic hard shell case.

# **ONLY \$395.00**
